Combining Intelligence Disciplines in the battle against evolving regional and global terror threats

Orateur / Speaker: **Michael KHALIFA**

Director of sales and business development

The fast changing landscape of global security threats requires an innovative response which coalesces multiple intelligence disciplines. In this session we will present an actual case study of a tier-one National Security organization in hot pursuit of a lone wolf planning a terror attack in a crowded airport. The presentation demonstrates the use of multiple intelligence disciplines and technologies, including Open Source intelligence, Big Data collection, and the fusion of diverse data sources, together with Tactical Intelligence deployed on both terrestrial and airborne platforms.

PROGRAMME DES CONFÉRENCES EXPOSANTS

Mardi 22 / Tuesday 22

03:00 pm (25 minutes) FR

Compagnie / Company: **DÉFENSE CONSEIL INTERNATIONAL**

Transferring the French defense and Security know-how in Africa

Orateur / Speaker: **Bernard ARATA**
Manager Naval Operational Offers

Défense Conseil International est la société française spécialisée dans le transfert du savoir-faire militaire et de sécurité français. L'État français est son donneur d'ordres. DCI est en cours de déploiement sur le continent africain afin de permettre à ses États de bénéficier de son expertise dans les meilleures conditions d'efficacité, de productivité et de pérennité. Son efficacité s'exprime à travers ses 45 ans d'expérience au service du conseil, de la formation et de l'assistance technique. Sa productivité est le fruit d'un juste ratio coût-efficacité permettant à tous de bénéficier de son savoir-faire. Sa pérennité se mesure à l'aune de sa capacité à fidéliser les États par une politique de formation ciblée et adaptée, par des standards de qualité (ceux des armées et de la gendarmerie françaises) et par un suivi jusqu'au déploiement des unités formées.

Défense Conseil International is a French company specialised in the transfer of French military and security know-how. The French State is its principal. DCI is currently in deployment on the African continent to enable its States to benefit from its expertise in optimal conditions in terms of efficiency, productivity and durability. Its efficiency is expressed through its 45 years of experience in consulting, training and technical assistance. Its productivity is the fruit of a fair cost-efficiency ratio, enabling everyone to benefit from its know-how. Its durability is measured via its capacity to foster the loyalty of States through a policy of targeted and tailored training solutions, through quality standards (those of the French armed forces and gendarmerie) and by a follow-up as far as the deployment of trained units.

03:30 pm (25 minutes) EN

Commercial Director Africa

Near real time space related solutions in particular for:

- Border control
- Maritime surveillance
- Tracking and fleet management
- Search and Rescue

11:00 am (50 minutes) EN

Compagnie / Company: **SECURIPOINT**

The Third Line of Defense: 21st Century Threat Detection

**SECURIPOINT**

Orateur / Speaker: **Nate CARPENTER**
Director of IIMS Department

In the 21st century, Persons of Interest (POIs) – terrorists, narcotics smugglers, human traffickers, and other criminals – are constantly on the move, changing identities as needed to travel undetected. Detecting persons of interest and other threats at the ports of entry and departure requires application of current-generation technologies and practices, but must go beyond these techniques to keep pace with the threat landscape. We can organize these detection and defense mechanisms into three lines, each of which provides critical decision support information at different scales to give us defense in depth at the border.
